Quarterly Period Ending 31 January 1968 (U)

TO: See Distribution

SECTION I (C) SIGNIFICANT ORGANIZATIONAL OR UNIT ACTIVITIES

1. (C) General:

a. The organizational structure of this Battalion is as follows:

ASSIGNED

HQ & HQ Battery, 1st Battalion (AW) (SP) 44th Artillery
Battery A, 1st Battalion (AW) (SP) 44th Artillery
Battery B, 1st Battalion (AW) (SP) 44th Artillery
Battery C, 1st Battalion (AW) (SP) 44th Artillery
Battery D, 1st Battalion (AW) (SP) 44th Artillery

ATTACHED

Battery G (Machine Gun), 65th Artillery
Battery G (Searchlight), 29th Artillery (Administration and
Courts-Martial Jurisdiction)

b. III Marine Amphibious Forces delegated the operational control of the Battalion to the divisions located throughout the I Corps Tactical Zone. The positions of units as reported previously remains unchanged. Battery G (Searchlight), 29th Artillery supported UMC and U.S. Army units from Phu Bai south. A significant change in operational control was the allotment of a platoon Battery D, 1st Battalion (AW) (SP) 44th Artillery, seven machinegun squads Battery G (Machine Gun), 65th Artillery and two searchlight sections Battery G (Searchlight), 29th Artillery to the 1st Cavalry Division (Airmobile).

c. The primary mission of the Battalion continues to be that of direct ground support. The Battalion maintains a limited capability to perform its air defense mission as a secondary role.

d. The ORLL for Battery G (Searchlight), 29th Artillery is attached as Inclosure 2.

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

2. (C) Intelligence:

a. During the reporting period, the Battalion S2 obtained intelligence from briefings conducted by 3rd MARDIV (FWD) at Dong Ha Combat Base and from ARVN units, MACV and other U.S. Army units supported. The information obtained was disseminated to the batteries located at Dong Ha through daily battalion briefings. Battery C at Camp J.J. Carroll and Battery D at Phu Bai received intelligence data from the regimental headquarters that they supported.

b. The Battalion continued to have the responsibility for the perimeter defense in Sector II, Dong Ha Combat Base. Sector elements conducted a reconnaissance patrol south of the base on a daily basis. On one occasion a booby trapped 105MM round was found and disarmed. On 29 January, a patrol directed artillery on a suspected enemy position. This coincided with reports from Marine reconnaissance inserts that indicated an increase of enemy activity to the south of Dong Ha Combat Base.

c. During the reporting period, the weather was favorable to friendly forces. It rained heavily the first 20 days of November however, the rest of the period was unseasonably dry. Repairs on resupply routes were made and roads to Con Thien (A4) and Ton An (A3) were completed. The weather had little effect on air resupply and many tons of supplies were air lifted to outlying positions. Even though there was little rain, the terrain would not support cross-country operations by tracked or wheeled vehicles.

d. On 1 December 1967, construction of a barrier system to stop infiltration of enemy forces from North Vietnam was begun. Existing outposts and fire bases, such as Gio Linh, Con Thien, Cam Lo, Rockpile, and Ca Lu were improved. New positions, completed and occupied by the end of the reporting period were: A1, between the coast and Gio Linh (YD 281717); A3, between Gio Linh and Con Thien (YD 166724); C1, an artillery fire base at YD 215673. Battery A deployed two M42's to A3 to support a Marine battalion and Battery B deployed two M42's to C1 to support an Army field artillery battalion. No Battalion equipment was sent to A1.

e. During an intelligence briefing in early November, it was predicted that the enemy's most probable course of action would be an attack on Khe Sanh at the end of the monsoon season. The prediction appears valid as only small groups of enemy were sighted during November and December. However, during the latter part of January large enemy forces were observed along the DMZ with exceptionally large concentrations around Khe Sanh. The enemy forces continued to be predominantly NVA with a few VC reinforcements/replacements. To counter this threat, Marine elements at Khe Sanh were increased from a battalion to a reinforced regiment. A large reconnaissance screen was established and artillery was relocated so greater support could

CONFIDENTIAL

CONFIDENTIAL

AVGLB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

be given to the area. In conjunction with his build-up, the enemy tried to interdict resupply routes. His first effort was in mid December between the Rockpile and Ca Lu (see Incl 1, 19 Dec 67). Subsequent ambushes grew in size and ferocity (see Incl 1, 13 Jan 68 and 24 Jan 68). Other tactics employed by the enemy to hinder resupply were destroying bridges and mining activity. Numerous vehicles hit mines and this Battalion lost two M42's to mines during January. The enemy also harassed the efforts of mine sweep teams to clear roads (see Incl 1, 20 Jan 68 and 27 Jan 68). The enemy was partially successful in his effort to interdict resupply routes, as at the end of January, only large and well protected convoys could move over the roads.

3. (C) Operations and Training Activities;

a. Plans:

Continued direct support of combat forces in the I Corps Tactical Zone.

b. Operations:

(1) The Battalion and elements of Battery G, 65th Artillery have participated in the following operations during the reporting period:

Jeb Stuart - 28 Jan 68 to present (Batteries D, G/65)

Kentucky - 1 Nov 67 to present (Batteries A, B, G/65)

Lancaster - 1 Nov 67 to present (Batteries C, G/65)

Neosho - 1 Nov 67 to 28 Jan 68 (Batteries D, G/65)

Osceola - 1 Nov 67 to present (Battery A)

Scotland - 1 Nov 67 to present (Batteries A, G/65)

Wallawa - 1 Nov 67 to 28 Jan 68 (Battery G/65)

(2) During the reporting period, perimeter defense of Dong Ha Combat Base was provided by M42 weapons of Batteries A and B; perimeter defense of Camp J.J. Carroll was provided by Battery C; and Battery D provided perimeter defense of Phu Bai and Camp Evans. M55 weapons of Battery G, 65th Artillery were utilized daily primarily for convoy security escorts throughout the I Corps Tactical Zone.

CONFIDENTIAL

AVGLB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RC3 CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U).

(3) The Battalion and attached units were engaged in tactical operations daily throughout the reporting period (92 days). Inclosure 1 lists significant missions performed by the Battalion and Battery G, 65th Artillery. At the end of the quarterly period 31 January 1968, the Battalion was tactically deployed in direct support as follows:

<u>UNIT</u>	<u>LOCATION</u>	<u>UNIT SUPPORTED</u>
HEB/1/44	Dong Ha YD 235585	1st Battalion, 44th Artillery
A/1/44 (-)	Dong Ha YD 235585	3D Marine Division

G/65 Seven Squads	Camp Evans YD 535318	1st Air Cavalry Division

c. Training:

(1) The Battalion established a noncommissioned officer training program. The course covers 12 hours of instruction and aims at familiarizing young squad leaders with leadership principles and pertinent data of the M42 and M55 weapon systems. The program will be conducted each quarter.

8

CONFIDENTIAL

AVCIB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

(2) The Battalion has lost a great many trained personnel due to rotation and combat casualties. Trained replacements are not being received; therefore, the Battalion must continue to stress training. The majority of the daily training program (92 days) was concentrated on OJT at the section and squad level. The wide dispersion of elements of the batteries makes centralized instruction impracticable.

d. Chemical: None.

e. Psy War:

During the reporting period, numerous reward leaflets were passed out by battalion elements on road nets in the Dong Ha area. Two grenades were turned in by children to a crew providing road security. On another occasion a French grenade and a magazine with ammunition were turned in to the Battalion Liaison Officer. Rewards were given to the indigenous personnel who turned in these articles.

4. (C) Logistics:

(1) The DX facility mentioned in last quarter's OPLI has been set up at the supporting task force. They have not achieved a complete fill level yet to permit direct exchange of all the items included on their DX list. However, the availability of the parts they do have on hand has helped to reduce the deadline rate within the Battalion. Timely maintenance of signal equipment continues to present problems as the maintenance support activities are not able to obtain required repair parts. To further reduce deadline time, this Battalion has recommended to the 560th DSSA in Da Nang that a partial ASL of approximately 800 line items, based upon heavy demand from the four artillery units at Dong Ha, be maintained at the task force facility here at Dong Ha. The administrative work load would be handled by the addition of two ordnance repair parts specialists to the task force organization.

(2) Adequate controls of the 40MM ammunition by lot number cannot be implemented due to the many different lot numbers issued by the ASP. The supporting activity's Ammunition Control Officer has researched this problem area and offers no immediate solution.

5. (U) Civil Affairs:

a. Dai An Hamlet (YD 270590): A modern type shelter of cement blocks was completed by the residents of the Hamlet to house eight pigs that had been previously given them by the unit. Battalion elements at Dong Ha continue to supply edible waste daily from the mess halls to feed the pigs. The village personnel have provided exceptional care for the pigs which now

CONFIDENTIAL

9

CONFIDENTIAL

AVGEB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

average approximately 150 pounds each in weight. The residents of the Hamlet have also started building a dispensary with materials supplied by the Battalion. For TET the Battalion prepared a gift box for each family in the village which was well received.

b. On 24 December 1967 the Battalion sponsored a Christmas party for the children at the Dong Ha Catholic Orphanage. Approximately 150 children attended. A dinner was prepared by the Battalion's mess halls. Movies were also shown, and small favors were given to the children.

c. Battery D continues to aid the Vien Duc-Anh Orphanage home in Hue. Over the past three months, the average contribution has been 70 cents per man. A total of \$240.00 has been contributed during this period.

d. The Battalion Surgeon and the Medical Section treated 3,938 patients in connection with MEDCAP during the reporting period. The patients were visited and treated at the following locations: Catholic Orphanage at Dong Ha (YD 236608), and at Dai An (YD 270590). When any serious pathology was discovered during the Battalion MEDCAP program the Vietnamese national was transported by the Battalion Medical Section to the civilian hospital at Quang Tri for further evaluation and treatment.

6. (C) Personnel:

a. Awards and Decorations: During the period 1 November 1967 to 31 January 1968, the Battalion and Battery G, 65th Artillery sustained 56 battle casualties, two of whom were killed in action. A total of 66 awards were presented during the reporting period:

(1) Bronze Star w/"V" device	- 11 (3 posthumously)
(2) Bronze Star	- 10
(3) Army Commendation w/"V" device	- 12
(4) Army Commendation Medal	- 13
(5) Purple Heart	- 20 (2 Posthumously)

b. Religious Activities:

(1) Regular Sunday Services were held in the Battalion Chapel at Dong Ha with Protestant services at 0930 hours and Catholic services at 1115 hours. Protestant services were conducted by the Battalion Chaplain while Catholic coverage was provided by Chaplain (Major) MacElroy from the

CONFIDENTIAL

CONFIDENTIAL

AVGLEB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

11th Engineer Battalion, USMC. ~~24th~~ Sunday the Battalion Chaplain traveled to Camp J.J. Carroll for a service at Battery C mess hall at 1315 hours.

(2) Temporary religious coverage was provided by the Battalion Chaplain in this ~~quarter for~~ the 9th Motor Transport Battalion, USMC and the 9th Marine Regiment during the absence of their Navy Chaplains.

(3) Other elements of the Battalion were provided religious coverage in ~~their~~ area by Navy Chaplains who conducted services for the Marines. The nature of the Battalion Chaplain's ministry to these units was limited to personal visits during the month.

(4) Special Christmas services for our Battalion included a midnight mass held at 11th Engineer Battalion Chapel, and a Christmas Eve candlelight communion service for Protestants in our chapel. Services were conducted on Christmas Day at the same time that Sunday Services are held. A New Years Eve watchnight service was held for Protestants and a New Year's Day service was conducted for Catholics in the Battalion Chapel.

(5) Memorial services were held for the three men of the Battalion who died during this quarter as a result of enemy action.

(6) The Battalion Chaplain visited troops in the following positions: Gio Linh, Con Thien, Khe Sanh, Cam Lo, Rockpile, D-5, Camp J.J. Carroll, Khe Gio Bridge, Quang Tri Airfield, Ca Lu, Da Nang (including Hill 190, Hill 55, Anti-tanks, 8" Positions and Namo Bridge), Phu Bai, Camp Evans, Cumberland, Gia Le, Quang Tri, Chu Lai, Duc Pho (including LZ Thunder, LZ Baldy, LZ Colt, LZ Ross, and LZ Leslie). On visits just prior to Christmas, boxes, gifts, cards, and letters from both individuals and groups in CONUS were distributed to those units which were considered to be the most isolated.

(7) Members of the Battalion erected a new permanent cross in front of the chapel. Made from the salvaged barrels of caliber .50 and 40MM guns, the cross is distinctly artillery. Dedication services were conducted on 4 December 1967 with the Commanding Officers of all Artillery Units located in Dong Ha present. Other improvements were made on the interior of the chapel. Two distinguished guests in our chapel were Senator John Tower (Texas) on 24 November and Chaplain (MG) Francis Sampson, Chief of Chaplains on 28 December 1967.

c. Education:

Since 1 November 1967, 21 individuals have taken the High School CED test and 5 individuals have taken the College General Examinations. Two persons enrolled in correspondence courses offered through USAFT.

CONFIDENTIAL

CONFIDENTIAL

7. (C) Artillery:

a. Ammunition expended 1 November 1967 - 31 January 1968:

40MM - 124,786

Caliber .50 - 187,412

b. Ammunition expended to date:

40MM - 509,895

Caliber .50 - 1,311,237

SECTION II (C) COMMANDER'S OBSERVATIONS AND RECOMMENDATIONS

Part I, Observations (Lessons Learned)

1. (U) Personnel: None.

2. (C) Operations:

a. Item: Perimeter defense test of the M42.

Discussion: Firing tests were conducted to ascertain the most effective means of employing the M42 against a ground assault from a perimeter defensive position. For the test, 25 cardboard targets were placed at a range of 220 meters. The targets were positioned so that they covered an area 50 meters in width and 15 meters in depth. The tests were conducted by: (a) firing at preiled rocks and metal scraps, (b) firing at five gallon cans of fougasse, (c) firing at the ground in front of the targets, and (d) firing at the center of the target area. The dual guns were bore sighted on the target before each test and 12 rounds were fired during each of the 4 tests.

Observation: Results of these tests indicate that firing at the ground in front of an assaulting force produces the greatest number of casualties and is the most effective way of stopping that force.

b. Item: Employment of the M42 and M55.

Discussion: When automatic weapons are committed to combat operations, a minimum of two should be employed. If only one automatic weapon is used, it is the obvious target for the enemy's antitank weapons. If two or more automatic weapons are employed, the enemy must divide his antitank weapons accordingly which increases the probability of one of the automatic weapons getting into action. This is of prime importance as the

CONFIDENTIAL

12

CONFIDENTIAL

AVGLB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

true defense of the automatic weapon is its offensive fire power. Further, once in action one automatic weapon can defend and support the other.

c. Item: Firing the M42 from a sandbagged position.

Discussion: If there is a space left between the M42 and a sandbagged position, the muzzle blast of the guns will gradually destroy the sandbag wall. However, if the M42 is driven into the position so that it just touches the wall the muzzle blast will be extended beyond the sandbag wall and the wall will not be destroyed.

Observation: M42's should be driven into a sandbagged position so that the vehicle is touching the wall facing the primary field of fire.

d. Item: Computation of firing data.

Discussion: The rapid and accurate computation of firing data is essential to the effectiveness of the M42 when used as an indirect fire weapon. If there is a difference in altitude between the M42 and target, the use of the mil formula to compute angle of site is a time consuming process.

Observation: A chart can be constructed indicating the angle of site for different ranges and vertical intervals. This will accelerate the computation of firing data.

e. Item: Mobility of the M55.

Discussion: The M55 crew at LZ Leslie, near Chu Lai, frequently moved their M55 throughout the perimeter in order to confuse the enemy to its exact location. On 3 January 1968, the enemy launched a mortar and ground attack on the LZ. The first six mortar rounds hit a position that the M55 crew had just vacated. Therefore, on this occasion, the tactic of keeping the M55 mobile prevented the enemy from pin pointing its location and probably kept the LZ from being penetrated or captured. (See Incl 1, 3 Jan 68).

Observation: The M55 should remain mobile and frequently change perimeter positions so that the enemy can not pin point its position.

f. Item: Locking the dual guns in azimuth when moving.

Discussion: Experience has shown that the azimuth operator can hold the dual guns when the M42 is moving less than 10 mph. When the

13

CONFIDENTIAL

AVGLB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Report Ending 31 January 1968 (U)

M42 is traveling at a speed greater than 10 mph, the azimuth operator cannot hold the dual guns and they will swing out of control. On one occasion the three bolts on top of the traversing mechanism were sheared off rendering the guns ineffective.

Observation: When traveling less than 10 mph, the dual guns do not have to be locked in azimuth. When traveling at a speed greater than 10 mph, the dual guns must be locked in azimuth.

3. (U) Training and Organization:

Item: Training of mess personnel.

Discussion: Mess personnel received from CONUS have little knowledge of the M59 Field Range and how to prepare appetizing "B" ration meals. Field ranges are used throughout Vietnam and "B" rations comprise many of the meals here.

Observation: Mess personnel, before coming to Vietnam, should receive extensive training on the M59 Field Range and the preparation of "B" ration meals.

4. (U) Intelligence: None.

5. (C) Logistics:

a. Item: Vest, fragmentation.

Discussion: As personnel rotate to CONUS they turn in their fragmentation vests to the Battalion's central issue facility. The condition of the satin outer cover of the vest often classifies it unserviceable. Such vests are turned in to be burned. Examination of the layers of nylon armor which go into the production of these vests has shown that; due to a plastic shell sewn around the nylon armor, it is only the green satin outer cover which is unserviceable.

Observation: Canvas repair shops presently in operation at most direct support maintenance facilities should be equipped with cloth similar to that used on the outer cover of fragmentation vests and unserviceable armored vests should be turned in for repair and reissue.

b. Item: Food containers.

Discussion: The present food container FSM 7330-238-24411 does not stand up well when used to transport food daily to the personnel occupying positions away from their base camp. The snap down fasteners are

CONFIDENTIAL

1 February 1968

AVCIB-C

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

attached by rivets to a very light and soft aluminum sheath. When the lid is closed, the pressure that the rubber washer applies to the fasteners pulls the rivets through the aluminum.

Observation: A reinforcing band of metal brazed around the top circumference would provide a stronger anchor for the snap down fasteners and would prevent the rivets that hold the fasteners from pulling through.

c. Item: Armored seat cushions.

Discussion: The NVL/WC continue to place emphasis on mining roads. Seat cushions made of nylon armor, such as is presently used in fragmentation vests, would provide personnel far greater protection from mine fragments than do present seat cushions. Also, under similar wear and tear conditions, nylon cushions would last longer.

Observation: Seat cushions made out of nylon armor would provide more protection from mine fragments than do present seat cushions. As a field expedient and in addition to placing sandbags on the floor, nylon armor from unserviceable fragmentation vests can be attached to seats for protection.

6. (C) Others:

a. Communications:

Item: Radio Set AN/VRC-46 mounted in M42.

Discussion: The placement of the radio set in the M42 is such that the radio receives heavy abuse by personnel entering the vehicle commander's hatch and personnel removing ammunition from behind the vehicle commander's seat.

Observation: A protective cage, made of 1/4 inch square steel, can be constructed to protect the radio. The cage can be bolted to the radio mount.

Item: Care of the electrical wiring system of the M42 during the monsoon season.

Discussion: During periods of heavy rain, water must not be allowed to collect in the driver's compartment or the engine compartment of the M42. If water is allowed to collect in these compartments, it will run into the master and starter relays when the M42 is parked on an incline with the engine compartment on the down hill slope. This will cause a short in the electrical system rendering the M42 inoperative.

CONFIDENTIAL

15

CONFIDENTIAL

AVGLB-C

1 February 1968

SUBJECT: Operational Report-Lessons Learned (RCS CSFOR-65) for
Quarterly Period Ending 31 January 1968 (U)

Observation: All hatches, covers, and doors should be kept closed as much as possible when it is raining. Any water that collects in the driver's compartment or the engine compartment should be drained immediately.

Part II, Recommendations:

1. (U) Personnel: None.

2. (U) Operations:

Recommend the observations made under operations in Part II be incorporated in the program of instruction for 1510's and 1174's at the USLADS.

3. (U) Training and Organization:

Recommend that mess personnel be trained on the M59 Field Range and in preparation of "B" ration meals before coming to Vietnam.

4. (U) Intelligence: None.

5. (C) Logistics:

a. Recommend that combat vehicle seat cushions be made of nylon armor.

b. Recommend canvas repair shops be outfitted to repair the skin covers of fragmentation vests.

c. Recommend that food containers, FSN 7330-238-2421, be modified to prevent the rivets holding the snap fasteners from pulling out when the lid is closed.

HEADQUARTERS, US ARMY VIETNAM, APO San Francisco 96375

TO: Commander in Chief, United States Army, Pacific, ATTN: GPOP-DT,
APO 96558

1. (U) This headquarters has reviewed the Operational Report-Lessons Learned for the quarterly period ending 31 January 1968 from Headquarters, 1st Battalion (AW) (SP), 44th Artillery (DD1A) as indorsed.

2. (C) Pertinent comments follow:

a. Reference item concerning fragmentation vest, page 11, paragraph 5a; and page 13, paragraph 5b: Concur. 1st Logistical Command has been instructed to investigate the recovering of the vest in conjunction with the theater-wide clothing and equipment maintenance program.

b. Reference item concerning food containers, page 11, paragraph 5b; and page 13, paragraph 5c: Concur. The unit should submit an Equipment Improvement Report (EIR) as outlined in TM 38-750.

c. Reference item concerning armored seat cushions, page 12, paragraph 5c; and page 13, paragraph 5a: Concur. This item should be studied by the appropriate CONUS agency to determine the merit of the proposal. Unit should submit a request for an ENSURE item if actual requirement exists.

3. (U) A copy of this indorsement will be furnished to the reporting unit through channels.

UNIT

MISSION

241440H Jan 68 to Elements C/1/44
242000H Jan 68

Five M42's C/1/44 from northern perimeter of Camp J.J. Carroll provided direct and indirect fire support for Marine convoy ambushed at vic YD 075571. Expended 8000 rounds 40MM at suspected NVA regiment. Target coverage was excellent; observed three secondary explosions. During engagement crews received sporadic sniper fire. Two WIA (NON-MEDEVAC); no equipment damage. (Ref: 1/44 SITREP for 241800H Jan 68).

241130H Jan 68 to One Sect C/1/44
241630H Jan 68 Two Sqd G/65

Elements from the Rockpile and Camp J.J. Carroll escorting a convoy from the Rockpile to Ca Lu received small arms and mortar fire. At vic YD 986506 one M42 caught fire and was completely destroyed. One M55 was sprayed with mortar shrapnel. Two WIA G/65 (NON-MEDEVAC). (Ref: 1/44 SITREP 241800H Jan 68).

241530H Jan 68 to One Sect C/1/44
242015H Jan 68

Two M42's commanded by 1LT Hardin from Camp J.J. Carroll along with two Marine M48's and reinforced platoon comprised a reaction force to extract Marine convoy ambushed at vic YD 075571. At 1615H the reaction force arrived vic YD 064571 and placed suppressing fires on the enemy forces at the ambush site. When the enemy fire subsided, one M48 and one M42 proceeded into ambush site to extract wounded. At 1645H vic YD 075571, M48 and M42 received RPG rounds and were immediately out of action. Two WIA C/1/44 (MEDEVAC); four WIA C/1/44 (NON-MEDEVAC). Both M42's sustained moderate damage. Expended 2200 rounds 40MM with unknown results. Estimated enemy regiment employed mortars, Recoilless rifles, RPG's and small arms. (Ref: 1/44 SITREP 241800H Jan 68).

241700H Jan 68 to Elements HHB/1/44, C/1/44 requested assistance from HQ/1/44
242100H Jan 68 A/1/44, B/1/44,
C/1/44, G/65 to extract their elements from ambush
vic YD 075571 (note above entries). In response two M55's G/65 and two M42's B/1/44 under the command of CPT Vincent

DEPARTMENT OF THE ARMY
BATTERY G (SEARCHLIGHT) 29TH ARTILLERY
APO San Francisco 96337

AVCL-AT-1/44-BH

1 February 1968

SUBJECT: Operational Report-Lessons Learned for Quarterly Period Ending
31 January 1968 (U)

TO: Commanding Officer
1st Bn (AW) (SP) 44th Artillery
ATTN: S-3
APO San Francisco 96269

SECTION I (C) SIGNIFICANT ORGANIZATION OR UNIT ACTIVITIES

1. (C) General:

a. The Battery continues to support USMC and U.S. Army units in the I Corps Tactical Zone from Camp Evans South as a part of 1st Battalion (AW) (SP) 44th Artillery.

b. The primary mission of the Battery continues to be that of providing direct and indirect illumination in support of night operations within the I Corps Tactical Zone. The Battery maintains its capacity of fighting as Infantry as a secondary role.

2. (C) Intelligence:

The Battery CO continued to attend daily briefings conducted by the 11th Marines located at Da Nang. Additional intelligence was obtained from sections in the field and their supported units. Third Platoon, located in Chu Lai, obtained its intelligence from the Americal Division.

3. (C) Operations and Training Activities:

a. Plans:

Continue to support USMC and U.S. Army in the I Corps Tactical Zone.

b. Operations:

(1) The AN/MSS-3 Searchlight system of this unit has been used to augment the defense of key installations such as bridges and fire support bases. It has also been used to provide illumination for patrols and ambushes, guide MEDEVAC helicopters, mark bomb lines for tactical airstrikes, detect enemy river borne traffic, and provide long-range H and I illumination.

CONFIDENTIAL

AVGL-AT-1/44-BH

1 February 1968

SUBJECT: Operational Report - Lessons Learned for Quarterly Period Ending
31 January 1968 (U)

Two or more searchlights have pinpointed enemy rocket launching sites with their intersecting beams to aid in the adjustment of counter-rocket artillery fire and provide a visual marking for tactical airstrikes.

(2) The Battery engaged in tactical operations daily throughout the reporting period. Inclosure 1 lists significant missions performed by Battery G (Searchlight), 29th Artillery. At the end of the Quarterly Period 31 January 1968, the Battery was tactically deployed as follows:

<u>UNIT</u>	<u>LOCATION</u>	<u>UNIT SUPPORTED</u>
G(-)/29	Da Nang	11th Marines
G/29		
4 lights	Camp Evans	1st Air Cavalry
G/29

G/29		
1 light	LZ Carrington	11th Infantry Bridge
G/29		
1 light	LZ Thunder	11th Infantry Bridge

c. Training:

(1) The Battery established a section level training program due to the wide dispersion of the battery elements.

(2) All replacements receive a two-day orientation and familiarization training program with the searchlight and their individual weapons. The majority of the training is OJT at the section level.

d. Chemical:

The Battery conducted an inspection of all protective masks for fit, cleanliness, and serviceability during the month of January.

e. Psywar: None

4.(C) Logistics:

Logistical support from the Da Nang Sub Area Command has been generally satisfactory. Some problem areas that exist are excessive repair time for signal equipment and the lack of an ASL of searchlight major components. Signal equipment that cannot be repaired within a thirty day time frame should be turned-in and new equipment requested. Maintenance facilities should maintain signal floats to replace items in for repair. The direct support unit should maintain an ASL of major searchlight components because the present system of evacuating major components to CONUS for DX results in excessive downtime of our searchlights and is the principle reason for non-operational status.

31
CONFIDENTIAL

WFL-AT-1/44-BH

1 February 1968

SUBJECT: Operational Report - Lessons Learned for Quarterly Period Ending 31 January 1968 (U)

5. (U) Civil Affairs: None.

6. (C) Personnel:

a. Awards and decorations: Seven awards were presented to personnel of this Battery during the reporting period 1 November 1967 to 31 January 1968:

(1) Bronze star	1
(2) Air Medal	2
(3) Army Commendation w/"V" device	1
(4) Purple Heart	3 (1 Posthumously)

b. Education:

Since 1 November 1967, two men have taken the High School G.E.D. test and two have enrolled in USAFI courses. There are now a total of eight men enrolled in USAFI courses in this unit.

SECTION II (C) COMMANDER'S OBSERVATIONS AND RECOMMENDATIONS

Part I, Observations (Lessons Learned)

1. (C) Personnel:

a. Item: Replacements.

Discussion: Replacements are arriving at this unit with training in just about every aspect of artillery except searchlights. As a result this battery must spend many man-hours in training incoming personnel.

Observation: A school for awarding personnel MOS 17E should be established in CONUS.

b. Item: Shortage of personnel.

Discussion: A searchlight section consists of four men and two searchlights. It takes two men to operate a searchlight therefore, when a man is absent from a section a replacement must be obtained from one of the support elements of the battery. This puts the battery in a constant state of turmoil and interferes with its smooth functioning.

Observation: Each searchlight section should consist of five men.

CONFIDENTIAL

40

AVG-AT-1/44-BH

1 February 1968

SUBJECT: Operational Report - Lessons Learned for Quarterly Period Ending
31 January 1968 (U)

- c. Item: Promotion within a searchlight section.

Discussion: A searchlight section is manned by one SGT E5 and three PFC E3's. As this unit is authorized no E4's within a searchlight section there is no provision for promoting within the battery. Further, when it is necessary to split (a section) it leaves a PFC E3 as the ranking man on one of the lights.

Observation: A searchlight section should be authorized one SGT E5, two SP4 E4's, and two PFC E3's.

2. (C) Operations:

- a. Item: Local security.

Discussion: On two occasions the enemy has overrun light positions immediately after an illumination mission was completed.

Observation: Just prior to completion of an illumination mission a sweep of the perimeter wire using infrared light should be executed. Also the searchlight crewman must be prepared to defend their searchlight with small arms, grenades, and claymore mines.

- b. Item: Searchlight as LP.

Discussion: It has been proven that enemy movement takes place after an illumination mission has been completed.

Observation: Crew members should remain on the searchlight position and listen intently immediately after completion of each mission.

- c. Item: Intersecting searchlight beams.

Discussion: Searchlights are positioned like an artillery piece. Therefore, accurate azimuth information can be obtained from or set into a searchlight. This means that when two searchlight beams intersect, the exact location of that intersection can be ascertained.

Observation: Intersecting searchlight beams can be used for guiding air strikes, pin pointing enemy locations, and adjusting artillery fires.

- d. Item: Integration of the searchlight into a perimeter defense.

Discussion: A searchlight, in order to be effective, has to be an integral part of a defensive position. Thus, when the enemy is illuminated he can be immediately brought under fire.

5 38

CONFIDENTIAL

41
CONFIDENTIAL

AVGL-AT-1/44-BH

1 February 1968

SUBJECT: Operational Report - Lessons Learned for Quarterly Period Ending
31 January 1968 (U)

Observation: When deployed to a perimeter position, the searchlight crew must insure that they are tied in with a quick fire channel.

- e. Item: Use of searchlight in ambushes.

Discussion: When planning an ambush, a patrol leader may coordinate the use of a searchlight to illuminate the ambush site. Illuminating the killing zone will confuse the enemy, destroy his command and control and give friendly elements a greater kill probability.

Observation: Supported units should be made aware of all searchlight capabilities.

3. (C) Training and Organization.

- a. Item: Training of searchlight crews on mandatory subjects.

Discussion: The majority of the personnel in the unit are located at field positions which are spread throughout the I Corps Tactical Zone. Formal classroom instruction is not feasible.

Observation: A looseleaf training book with the mandatory classes in narrative form, can be disseminated to personnel in outlying positions.

4. (U) Intelligence: None.

5. (C) Logistics:

- a. Item: Establishment of ASL of major searchlight components.

Discussion: Under the present system, all major searchlight components are evacuated to CONUS for direct exchange or repair. The turn around time is 30 to 90 days and results in equipment being non-operational excessively.

Observation: An ASL of searchlight major components should be maintained at the DSU and direct exchange facility established for these items.

6. (U) Others: None.

PART II, RECOMMENDATIONS

1. (C) Personnel.

- a. Recommend a school to award MOS 17E be established in CONUS.

CONFIDENTIAL

AVGL-AT-1/44-BH

1 February 1968

SUBJECT: Operational Report - Lessons Learned for Quarterly Period Ending
31 January 1968 (U)

b. Recommend that the searchlight TO & E be modified to include five men per section with a grade breakdown as follows: One E5, Two E4's, and 2 E3's.

2. (U) Operations: None.
3. (U) Training and Organization: None.
4. (U) Intelligence: None.
5. (C) Logistics:

Recommend establishment of an ASL of searchlight major components at Da Nang DSU and a direct exchange facility established there.
